About the workshop

Creativity is a paramount element to allow us to move forward in our process. It will be building up during the workshop through different, well sequence and joyful activities. This is one of the main characteristics to free ourselves from our conscious and unconscious level.

In order to achieve this, we intend to use techniques of theatrical games, language games, role plays and improvisations.

Aims

- To build up an environment of trust and respect of each other, allowing us to discover and develop our own creativity.
- To stimulate the capacity of expression of each student by enabling them to find the right form and way to express it in Spanish.
- To develop a proactive attitude to understand others and oneself, through a continuous verbal and non-verbal interaction.

Participants

People with or without acting experience.

Loose clothing should be worn.
